

ONE MONTH CERTIFICATE COURSE ON "DNA BIOLOGY - BIOINFORMATICS" (ONLINE)

16 May - 15 June, 2022

In the recent years, there has been huge demand in bioinformatics and cheminformatics fields because of its myriad of applications, in various areas like molecular medicine, personalized medicine, gene therapy, drug development and even space biology. Keeping this in view, we are organizing a certificate course, where one can fathom and understand about the topics on Bioinformatics and Cheminformatics.

The topics include-

1. Basics of Bioinformatics
2. Bioinformatics tools and Databases
3. Basics of Proteomics
4. Proteomics tools and Databases
5. Basics of Cheminformatics
6. Cheminformatics tools and Databases
7. Molecular and Homology modeling
8. Protein-hit binding (docking studies)/drug discovery and design tools
9. Brief introduction to genomics

After completing this certification course by an industry scientist from reputed institutions, you will have a clear picture on carrying out your next life sciences project at computational level.

Fee: Rs. 5000

Last date: 13th May 2022.

Course Timings: 10:30AM-11:45 AM(Monday -Friday).

Who can participate:

Undergraduates, Postgraduates, Ph.D. scholars, Post-docs, and Faculty in biology, chemistry, and pharmacy from academic institutions and scientists working in biopharma industries.
